NADPH oxidases, oxalate oxidases amine oxidases and glucose oxidases.

35. (new) The method of claim 34, wherein the oxidase is barley or wheat germ oxalate oxidase.--

REMARKS

The Claims have been amended to eliminate multiple dependencies and to replace the term "characterized in that" with --wherein-. The new claims are supported by original claims 1-15 and by the specification. No new matter has been introduced.

Applicants also submit herewith a copy of the Search Report from the European Patent Office, together with copies of the references cited therein, which are listed on the attached Form PTO-1449.

Respectfully submitted
